## SLEEPING SOLUTION

### FERRETI'S PHILOSOPHY

*The FERRETI brand was created after careful long-term development, during which we relied on many years of knowledge and experience in the field of human sleep.*

*During sleep, vital regeneration processes take place in the body, with a direct impact on immunity, health and, consequently, the quality of life. Sleep positively affects our mental balance and psyche, stimulates vital energy and increases vitality. Therefore, quality sleep is one of the conditions for living a full life.*

*FERRETI's philosophy is to provide people with quality sleep.*

*The FERRETI brand is the embodiment of the desire for perfection. Our endeavour is to*

*create complex sleeping systems. We focus on each component of the bed separately. All this with the intention of turning sleep into an "experience".*

*At FERRETI, we combine design, quality materials and advanced construction solutions in a true symbiosis. These are the three key pillars on which we strive to create first-class products.*

*At FERRETI, we create structurally advanced and progressive systems that create ideal solutions for your sleep. All efforts are devoted to carefully balanced sleeping systems, consisting of luxury beds, mattresses and mattress toppers. Supplementing of this line are anatomical pillows. We do not forget any product that directly affects the quality of sleep. Premium materials are used in this range,*

*thanks to which your sleep will be energizing, relaxing and harmonizing. The effectiveness of these materials is further enhanced by the precise design of the products. That is why each product perfectly fulfils its function in a complex sleeper system and can be further developed according to the individual requirements of the user.*

*The above-mentioned attributes are the result of continuous development and innovation.*

*Allow FERRETI to enter your life through deeper, better quality sleep.*

### PRESENTATION OF FERRETI

In FERRETI, our almost 30 years of experience in the production of products for healthy sleep materialize. Our pilot product was mattresses. But FERRETI’s vision was to provide a comprehensive solution for quality sleep, which is why the offer gradually expanded to include luxury beds, anatomical pillows and other accessories.

Quality is one of the absolute pillars of FERRETI. For this reason, we only use first-class materials from leading European suppliers in production. Our team of experienced experts carefully selects only the best for FERRETI. All materials used are certified and comply with the OEKO TEX Standard 100 directive, which guarantees the safety of the materials used.

Technology is a necessary condition for quality, which is why our machinery comes

## FERRETI

SLEEPING SOLUTION

from the world’s best manufacturers from Germany and Italy. The production process is certified by the ISO 9001:2008 quality system.

FERRETI has a team of development experts who, in cooperation with global manufacturers, prepare complex solutions for healthy sleep. Their goal is to apply the latest knowledge from research into final products. With innovations, we constantly improve the quality, functionality and improve the useful properties of the products. In this way, we fulfill the FERRETI philosophy – to provide people with quality sleep.

The hot news of Materasso Slovakia is a collection called ITALIAN DESIGN with MATERASSO. This collection presents a set of upholstered beds, the common feature of which is simplicity, airiness and sober elegance.

### ITALIAN DESIGN

Beds from the ITALIAN DESIGN collection with MATERASSO have a clean, balanced and harmonious appearance. The final effect of unrepeatable elegance is achieved by a combination of carefully selected upholstery materials in natural colors and their refined processing with an emphasis on details. Precisely worked detail becomes the supporting element for the characteristic design of individual MODENA and CREMONA beds.

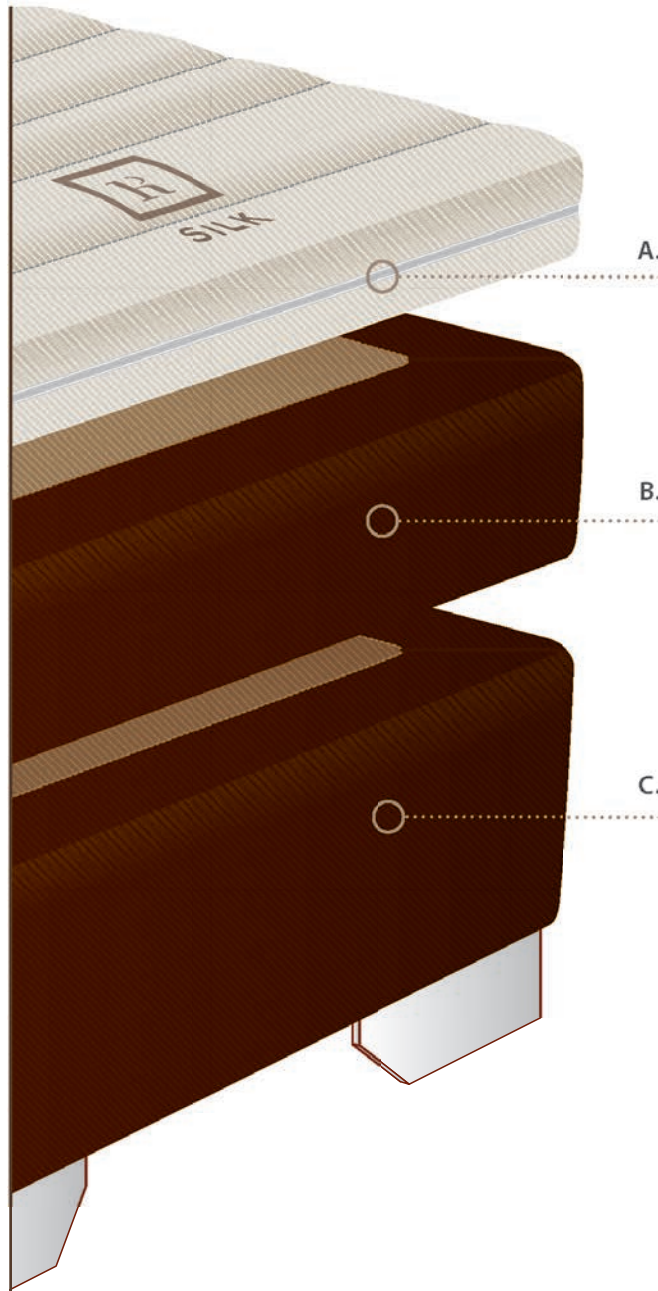

Beds from the ITALIAN DESIGN with MATERASSO collection are ideal for interiors where their purposeful and practical function is combined with a tendency to connect with nature. Their simplicity and purity stand out perfectly in modern spaces where emphasis is placed on minimalism and natural materials.

SLEEPING SOLUTION

FERRETI

**A.** MATTRESS TOPPER  
The mattress topper is the top layer of the continental bed system with which the human body is in direct contact. It determines the comfort of sleep and it is possible to choose the desired feeling according to the user's preference.

**B.** MATTRESS  
The mattress has an irreplaceable function in the continental bed system. It copies the shape of the human body, stabilizes the spine in the correct anatomical position and significantly determines the stiffness of the entire bed.

**C.** BOXSPRING  
A boxspring is a key component of a continental bed. It forms an airy and flexible base suitable for all types of mattresses. Boxspring is unique in its point adaptability.

CONTINENTAL BED  
– UNIQUE SYSTEM  
FOR QUALITY SLEEP

The product line of FERRETI continental beds is the embodiment of ideas about perfect comfort during sleep. The concept of sleeping on a continental bed is recognized worldwide as the gold standard for quality sleep.

Currently, it is the most sophisticated sleeping system, consisting of three components: a flexible boxspring, a mattress and a mattress topper. Each component of this system fulfills its specific function, while these components work together as a whole to ensure ideal properties. The composition of the continental bed creates a unique effect of double cushioning, which guarantees the required orthopedic support of the spine and at the same time induces an inimitable feeling of comfort.

WITH FERRETI YOU  
WILL DISCOVER A NEW  
DIMENSION OF SLEEP

FERRETI  
SLEEPING SOLUTION

LUXURY FERRETI BEDS

FERRETI beds – the key to living a full life. Only a person full of energy and vigor can enjoy the unique moments of the day. He can enjoy work, pursue his hobbies, and at the same time experience the joy of spending time with family and friends.

All this requires a lot of energy. The energy we use up during the day and the energy we have to renew again at night.

FERRETI is about energy, FERRETI is about sleep, FERRETI is about deep sleep.

Not in sleep, but only in the deepest sleep, our organism really rests. There is a renewal of mental and physical strength. Only during the deepest sleep does our body regenerate, repair itself and replenish lost energy.

The deepest sleep is the time when our mind and subconscious also rest. That's when we get rid of stress, forget about worries and problems. Then our mind is purified and regains the lost peace and mental balance.

Only after a night spent in full, deep sleep do we wake up perfectly rested and ready to fully experience the next day. We are energized and ready to conquer the world. Nothing is impossible anymore...

Discover energy, find your zest for life again, live to the fullest – discover FERRETI.

FERRETI SLEEPING SOLUTION

# SLEEPING SYSTEMS

BASED ON YOUR REQUIREMENTS,  
YOU CAN SUPPLEMENT YOUR  
CHOSEN HEADBOARD DESIGN  
WITH ANY SLEEPING SYSTEM  
FROM OUR OFFER

## BECOME A CO-CREATOR OF YOUR OWN BED

To fulfill your ideas about the ideal bed and in terms of functionality, we allow you to complement any type of headboard from the FERRETI collection with any of the sleeping systems listed below. At the same time, in order to achieve your maximum satisfaction, we offer you the option of choosing from a rich range of upholstery materials and their varied palette of colors, patterns and weaving.

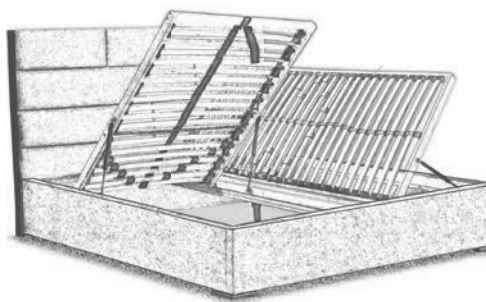

You can enhance the definitive appearance of the bed by choosing the right legs – their shape, material and finish.

Individual processes in the production of the complete FERRETI collection are carried out with the aim of creating products of the highest quality. Therefore, we emphasize not only the uniqueness and functionality of the structures, but also the perfect design and processing of wooden structures, the correct selection of high-quality materials and precise upholstery processing.

### BOXSPRING LOW/HIGH

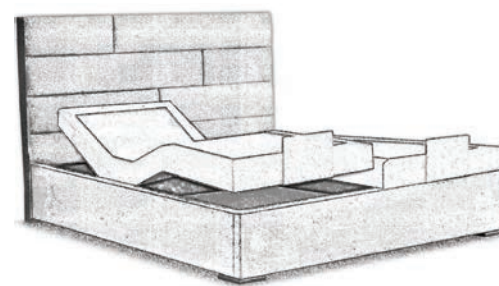

Boxspring, which contains a system of point-adjustable pocket springs, is stable, airy and with its elasticity helps absorb critical pressures, thereby extending the life of mattresses and toppers.

### DESIGN BED:

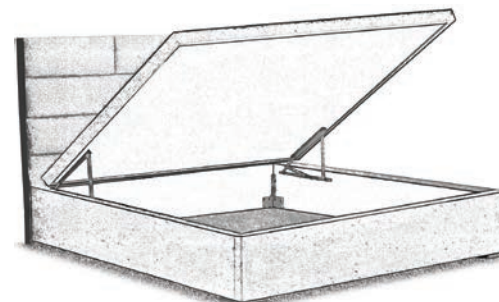

- BASIC
- SIDE STORAGE
- FRONT STORAGE

The storage spaces have grids that can be folded out from the legs (NV) or from the side (BV). The choice of the type of grid for the hinges should take into account the spatial possibilities after installing the bed in the bedroom – from which side access to the UP will be more convenient. In the version without UP in addition to all the regular grids from the offer, it is also possible to use special electrically adjustable grids for absolute comfort during sleep, but also for moments of active rest, e.g. while reading. The height of the sides is 25 cm, 30 cm and 35 cm.

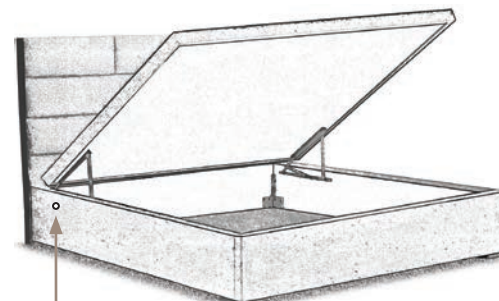

### BOXSPRING ELECTRIC

The core of the adjustable part of the boxspring is formed by a pocket spring and provides comfort that is difficult to achieve in other constructions. By supplementing the electrically adjustable core with a properly selected mattress, you will get a bed that will meet the expectations of even the most demanding clients.

### STORAGE EXCLUSIVE

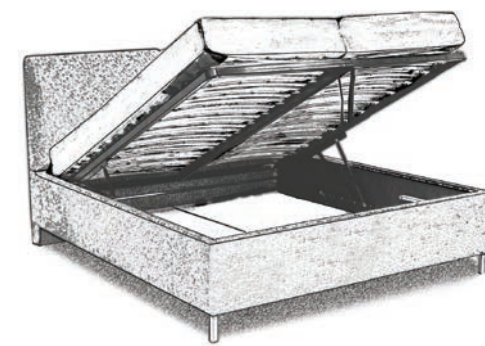

This type of sleep system provides several advantages. It is more advantageous in terms of space, because the surface of the bed occupies the same area as the sleeping surface in the interiors. At the same time, there is a large storage space in the bed without further divisions. Access to the storage space is convenient even when using "double mattresses".

Knob for electrical control

### ELEKTRO LIFT UP

The ELEKTRO LIFT UP box offers comfortable access to the storage space thanks to an electrically driven mechanism. By holding down the button on the bed frame, the hinged part of the box will be raised without the need to use mechanical force. This makes full use of the storage space easy and convenient.

Position A – oblique

Position B – horizontal

### DESIGN BED LIFT UP

When entering the storage space, it is possible to set the grid to position A (slanted) or subsequently from position A to position B (horizontal). Design bed with the most accessible storage space over the entire area. In addition, the storage space is supplemented by a fold-out to a horizontal position for easy replacement of bed linen or mattress cover after washing, or for storage space ventilation.

In this version of the hinge, it is also possible to use one large mattress for the entire bed without restricting access to the storage space. Even when folded into the position for changing the bed linen or mattress cover after washing, the part of the storage space directly at the headboard is very easily accessible, which is completely inaccessible when similar folds from the legs.

Another advantage is the possibility of ventilating the underside of the mattress during the day after tilting the grid to a horizontal position. In this way, the mattress does not suffer from insufficient ventilation when used on a bed with storage space.

8. Seacell spreading layer .....
9. Nanosilver foam (3 cm) .....

## FEATURES OF THE KING MATTRESS CONSTRUCTION

Sophisticated combination of springs with extra class foams to achieve royal comfort.

The hybrid spring system relieves the tension between your body and the surface of the mattress. This allows the Visco foam to adapt to the body in the most optimal way. The flexibility of the core, given by the use of pocket springs, will help with every change of position, so turning on the mattress is completely easy. Due to its height, it is one of the very high mattresses, and therefore, by using it even in low beds, we can create a "royal sleep".

composition of KING mattress cover

- A. MATTRESS COVER KING**  
..... This cover stands out for its elegance, softness and is very pleasant to the touch. Natural silk fiber contains protein substances similar to human skin, and therefore has a beneficial effect on it. In addition, the fiber resists microorganisms and does not cause any allergic reactions. Natural silk is supplemented with natural bamboo fiber with antibacterial effects.
- B. HOLLOW-FILL SHAPED FIBER**  
..... The hollow fiber is treated with silicone, which gives it exceptional fluffiness and durability. The above-standard fiber weight of 300 grams per m<sup>2</sup> thus enhances the overall comfort of the mattress.
- C. COMFORTABLE PUR FOAM**  
..... Stitched in the cover enables a more perfect adaptation of the mattress surface to the user's body.
- D. BOTTOM FABRIC**  
..... The highly elastic material co-creating the elasticity of the entire cover is essential for maximum use of the shape properties of the mattress core.

# QUEEN

TO THE KING BELONGS THE QUEEN!  
COMBINATION OF SPRINGS AND COMFORT FOAM  
FOR A SLEEP WORTHY OF A QUEEN

The perfect comfort of the used foams in combination with pocket springs will ensure maximum support of the body in the correct anatomical position with the possibility of choosing the felt stiffness of the sides, softer/harder side.

According to preferences, it is also possible to create a version of the QUEEN partner mattress so that 2 cores with different stiffness are used in the common mattress. The result of this combination is a complete partner mattress with different stiffnesses on the right and left sides of the mattress.

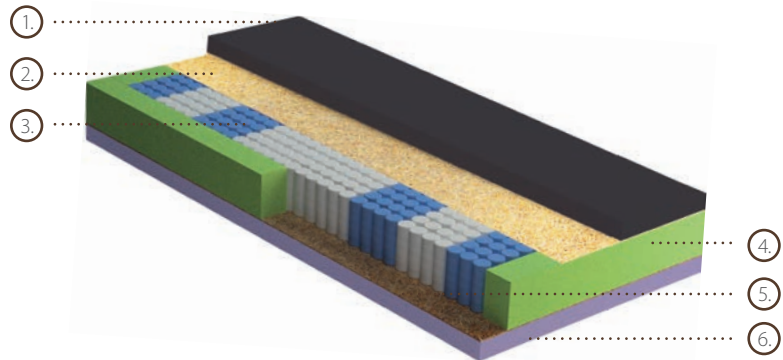

**QUEEN MATTRESS COVER**  
This cover stands out for its elegance and delicacy and is very pleasant to the touch. Natural silk fiber contains protein substances similar to human skin, and therefore has a beneficial effect on it. In addition, the fiber resists microorganisms and does not cause any allergic reactions. Natural silk is supplemented with natural bamboo fiber with antibacterial effects.

**HOLLOW-FILL SHAPED FIBER**  
The hollow fiber is treated with silicone, which gives it exceptional fluffiness and durability. The above-standard fiber weight of 300 grams per m<sup>2</sup> thus enhances the overall comfort of the mattress.

**BOTTOM FABRIC**  
The highly elastic material co-creating the elasticity of the entire cover is essential for maximum use of the shape properties of the mattress core.

SOFT VARIANT

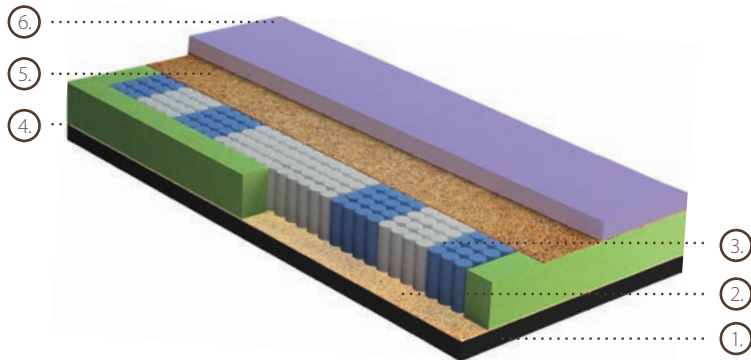

SOFTER SIDE

1. Comfortable softened foam NIGHTFLY
2. Spreading layer SEACELL
3. Pocket springs with 7 zones
4. Reinforced sides
5. Spreading layer made of coconut fiber
6. Comfortable LAVENDER foam

**FEATURES OF THE SOFT SIDE OF THE MATTRESS:**  
This side of the mattress, referred to as H3, is intended for lovers of higher comfort with a feeling of softness and better sinking into the mattress. This is achieved by using quality softened NIGHTFLY foam in the surface layer. The softer SEACELL spreading layer allows the load to be transferred to the pocket springs, which, with point, seven-zone adjustment, perfectly follow the user's body and ensure maximum support for the spine. To maximize the feeling of comfort, TOP QUEEN can be used on the mattress.

HARD VARIANT

TVRDŠIA STRANA

6. Comfortable LAVENDER foam
5. Spreading layer made of coconut fiber
4. Reinforced sides
3. Pocket springs with 7 zones
2. Spreading layer SEACELL
1. Comfortable softened foam NIGHTFLY

**FEATURES OF THE HARD SIDE OF THE MATTRESS:**  
For those who prefer a feeling of higher stiffness, this side of the mattress is intended. Higher feeling stiffness is achieved by using a stiffer LAVENDER foam in the surface layer and also a foamier spreading layer made of coconut fiber. 7 zone pocket springs adapt to the transferred load and create perfect support for the user's body in the correct orthopedic position. To increase the feeling of comfort, while maintaining the properties of the harder side of the mattress, a combination with TOPP QUEEN is possible.

## CHOOSING A MATTRESS ACCORDING TO YOUR BODY HEIGHT

COLLAGEN GLAMOR is a perfectly balanced premium mattress. It combines the best features of modern COLLAGEN, LAVENDER and MINDFOAM foams. It provides perfect point elasticity and excellent pressure relief. The arrangement of layers is innovative.

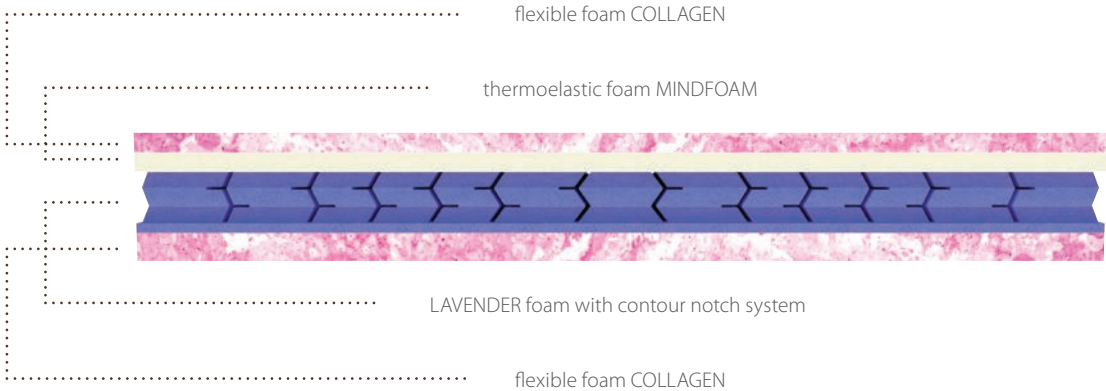

detail of the mattress core  
COLLAGEN GLAMOUR

detail of the mattress cover  
COLLAGEN GLAMOUR

- A. COLLAGEN GLAMOR MATTRESS COVER**  
The cover material is made of high-quality fibers, enriched with collagen and selenium - two substances that have a beneficial effect on the skin. Collagen is the protein responsible for the firmness and elasticity of the skin. Selenium is a trace element that has antioxidant, anti-inflammatory and regenerative effects. Together, these substances help to hydrate and restore the balance of the skin, reduce wrinkles and improve its appearance.
- B. HOLLOW-FILL FOAM AND FIBER FILLING**  
The cover contains a layer of soft, elastic foam and fluffy HOLLOW-FILL fiber, which is made of silicone. It gives it exceptional elasticity, fluffiness, breathability and airiness. The large weight used here increases the comfort of using the mattress.
- C. COMFORTABLE PUR FOAM**  
Stitched in the cover enables a more perfect adaptation of the mattress surface to the user's body.
- D. NON-WOVEN TEXTILES**  
The non-woven fabric cooperates with the elastic mattress insert. Protects the insert from dirt.

# COLLAGEN GLAMOUR

## PROPERTIES OF THE COLLAGEN GLAMOR MATTRESS

COLLAGEN GLAMOR is a perfectly balanced premium mattress. It combines the best features of modern COLLAGEN, LAVENDER and MINDFOAM foams. It provides perfect point elasticity and excellent pressure relief. The arrangement of layers is innovative. Thermoelastic foam is not located closest to the body, but a little lower, covered with a layer of elastic COLLAGEN foam. The result of this procedure is that the mattress immediately responds to pressure after falling asleep and provides full comfort. Thermo foam takes a while to warm up and soften, but during this time the remaining elastic foams provide excellent flexibility and comfort. This makes the mattress extremely dynamic and quickly adapts to any changes in sleeping position and load.

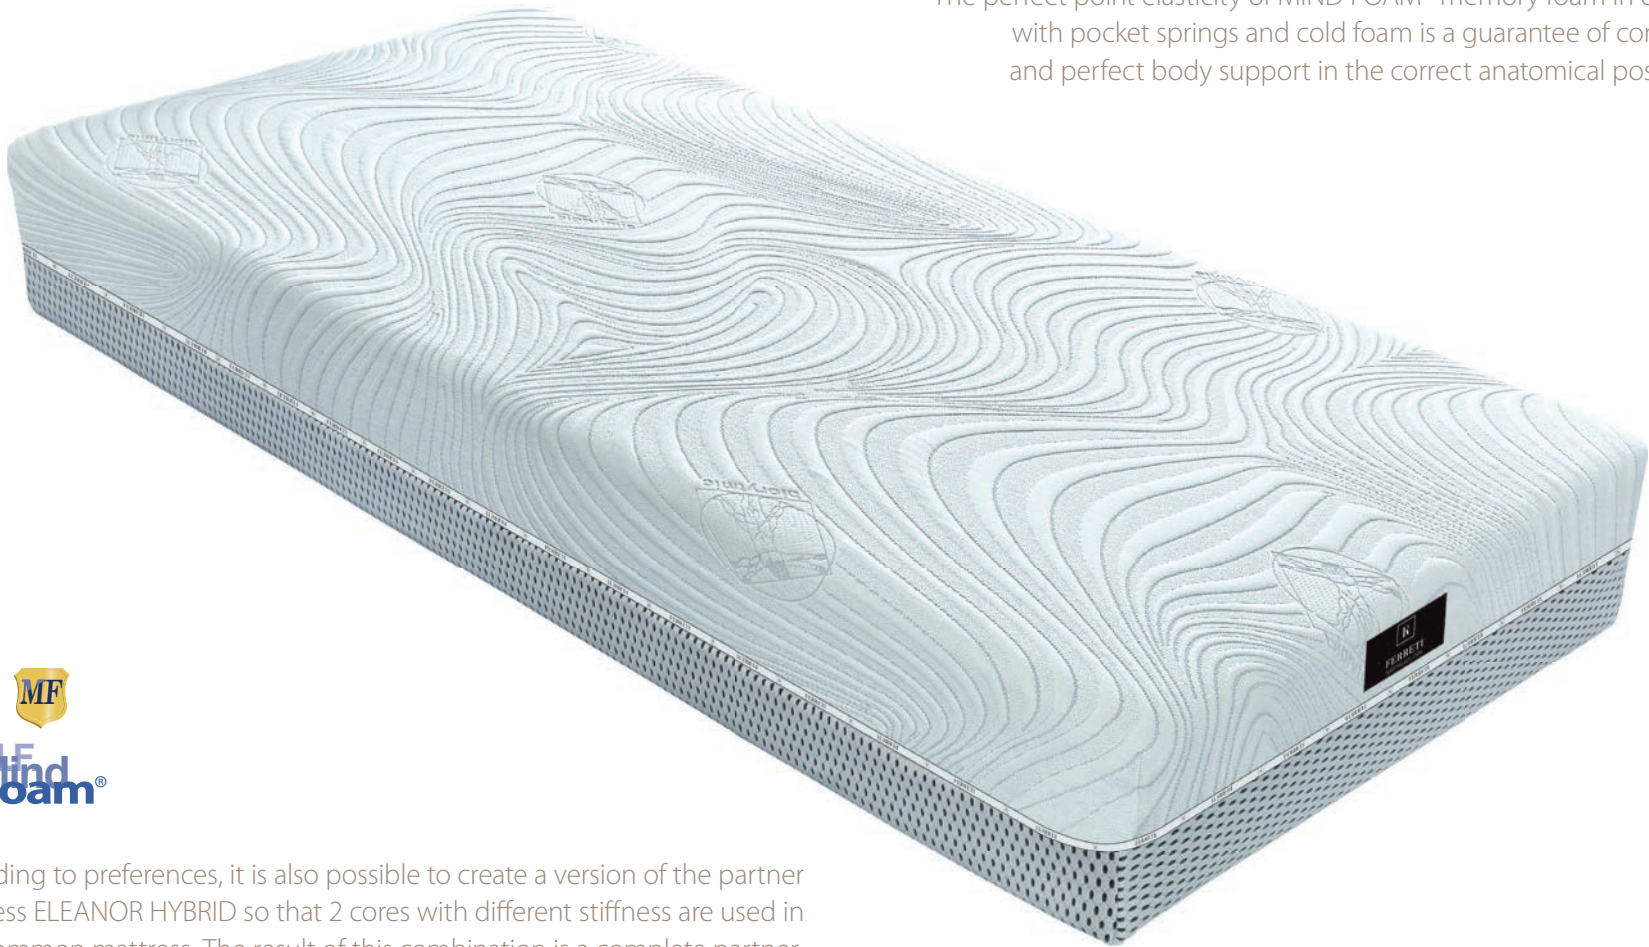

FERRETI quality guarantee

# ELEANOR HYBRID

POCKET SPRING MATTRESS  
IN SOFTER AND HARDER VERSIONS  
USING MEMORY AND COLD FOAM

The perfect point elasticity of MIND FOAM® memory foam in combination with pocket springs and cold foam is a guarantee of comfort and perfect body support in the correct anatomical position.

According to preferences, it is also possible to create a version of the partner mattress ELEANOR HYBRID so that 2 cores with different stiffness are used in the common mattress. The result of this combination is a complete partner mattress with different stiffnesses on the right and left sides of the mattress.

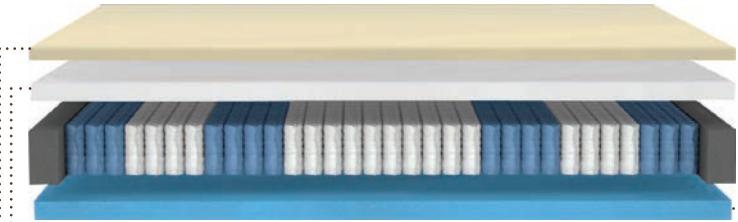

detail of mattress cover

BIORYTMIC substance containing natural minerals, which, by radiating natural energy, positively affect intrabody "communication" and the flow of energy flows. They are responsible for the proper functioning of the body, which is a basic prerequisite for preventing diseases and maintaining health. The effect of minerals will make you feel rejuvenated, your stress level will decrease, your body will relax and regenerate better, and you will feel better. You will wake up feeling fresh, rested, and your body will be full of strength and energy.

# ELEANOR HYBRID

VARIANT SOFT

- 1. MIND FOAM® Soft (3 cm)
- 2. MIND FOAM® Medium (5 cm)
- 3. Multipocket System 1000 springs
- 4. Lavender foam (5 cm)

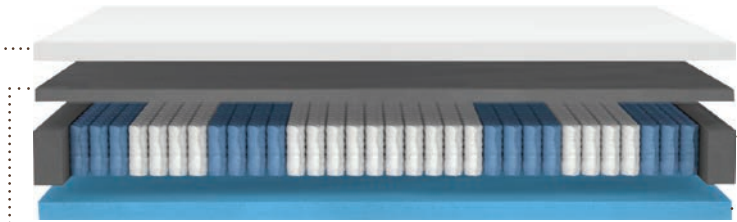

## CORE FEATURES OF ELEANOR HYBRID soft

This mattress is a combination of advanced foams as well as the Multipocket System 1000 for maximum comfort. The mattress will suit a wide range of customers, it perfectly accommodates users of different weights and body types.

The top layer provides an absolute feeling of comfort thanks to two layers of MIND FOAM® foam. It is a branded memory foam of the latest generation. It provides high comfort even in a cold environment and significantly faster adaptability when changing position.

With the 1000 spring system, each spring is stored in a bag, which allows it to copy the point load independently. It adds orthopedic spine support capabilities to its features thanks to a greater number of springs and their distribution into seven stiffness zones. Thus, a large number of independently "working" orthopedic points will give you a feeling of maximum comfort.

VARIANT MEDIUM

- 1. MIND FOAM® Medium (5 cm)
- 2. EvoPoreHRC® foam (3 cm)
- 3. Multipocket System 1000 springs
- 4. Lavender foam (5 cm)

## CORE FEATURES OF ELEANOR HYBRID medium

In the medium version, in order to achieve a higher level of stiffness, one layer of MIND FOAM® foam is replaced by EvoPoreHRC® foam.

We used EvoPoreHRC® foam in the mattress, which is characterized by good dynamic and elastic properties, and at the same time is extremely stable and consistent. It is a foam with revolutionary constancy of all parameters, even under the influence of moisture, heat and pressure – three factors that have a negative effect on the foam in the mattress when sleeping.

Conventional foams have a problem dealing with them and usually there is a significant change in the elastic-mechanical properties of the foams. Compared to them, the EvoPoreHRC® foam shows long-term unchanged parameters even with the negative interaction of the mentioned factors.

In addition, the fiber resists microorganisms and does not cause any allergic reactions. Natural silk is supplemented with natural bamboo fiber with antibacterial effects.

**B. HOLLOW-FILL SHAPED FIBER**

The hollow fiber is treated with silicone, which gives it exceptional fluffiness and durability. The above-standard fiber weight of 300 grams per m<sup>2</sup> thus enhances the overall comfort of the mattress.

**C. NON-WOVEN TEXTILES**

The highly elastic fabric, which co-creates the elasticity of the entire cover, is essential for maximum use of the shape properties of the mattress core.

PROPERTIES OF THE PILATIS MATTRESS CORE

The original air channel system of the PILATIS mattress increases breathability in all directions. This results in a perfect flow of air through the entire mattress. An environment unsuitable for the occurrence of mites is created, the perspiration of the human body is reduced, which brings about an increase in the hygienic standard of the mattress. The combination of a system of thermoregulation and zoning with perfect spine support guarantees the regeneration of the body during the entire period of sleep.

The core of the PILATIS mattress is made of the unique brand NANOSILVER foam developed for the most exclusive lines of mattresses. Permanent elasticity, excellent elasticity and a high standard of point elasticity guarantee an even distribution of body pressure. The optimal open cell structure guarantees a high level of permeability with excellent moisture regulation, which is additionally supported by the profiling of the mattress core.

NANOSILVER foam is made according to the strictest criteria guaranteeing the highest quality. The PILATIS mattress is produced in two versions of stiffness H2/H3 and also in two heights of 23 and 25 cm.

# RAYON

MATTRESS WITH MINIMUM  
BACK PRESSURE ON YOUR BODY

Pamper your body on a RAYON mattress. A thick layer of high-quality memory foam will allow the weight of your body to be evenly distributed over the entire surface of the mattress with minimal back pressure. This phenomenon is also described as weightlessness.

detail of RAYON mattress core

detail of RAYON mattress cover

Perfect point elasticity of memory foam  
MIND FOAM® provides your neck, back, shoulders  
and feet the ideal support they need. Your body is thus in  
the correct anatomical position during sleep.

## A. RAYON MATTRESS COVER

VISCOSE fiber, as the basis of the mattress cover, is made of cellulose. This guarantees the fabric good absorbency, non-shrinking, breathability and unique adaptability for perfect support of the point elasticity of the mattress core. The cover fabric is very soft and comfortable to the touch. The unique woven pattern creates a very elegant impression on the mattress.

## PROPERTIES OF RAYON MATTRESS CORE

A thick layer of high-quality MIND FOAM® memory foam reacts perfectly to your body temperature, eliminating the formation of points with high back pressure. The result is better blood circulation and more peaceful sleep without constant changes in body position. The perfect shaping of the mattress provides ideal support for your neck, back, shoulders and legs. Your body is thus in the correct anatomical position during sleep.

MIND FOAM® memory foam, which is used for the upper part of the mattress, was developed with the aim of giving perfect support to the human body when lying down. Its basis is viscoelastic foam supplemented with the unique ability of point elasticity with minimal back pressure. The result is a perfect feeling of relaxation and accelerated regeneration of the body during sleep.

The bottom side of the mattress uses a unique brand NANOSILVER foam, which is characterized by permanent elasticity, excellent elasticity and a high standard of point elasticity. The RAYON mattress is produced in two versions of hardness H2 / H3 and also in two heights of 20 and 25 cm.

# ALTEZA TALALAY

CHOICE OF MATTRESS ACCORDING  
TO CHARACTER HEIGHTS

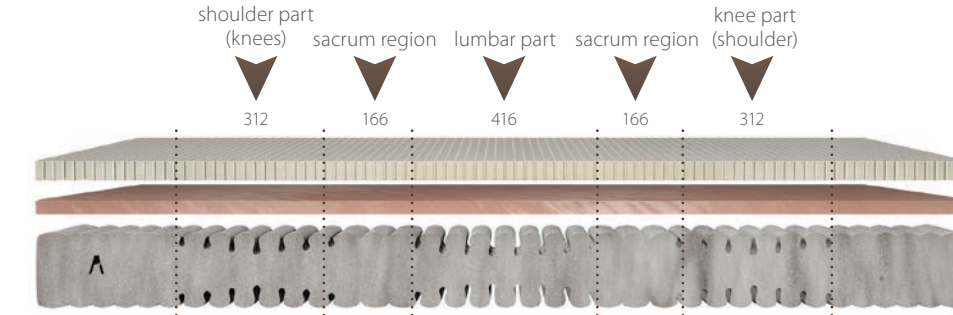

ALTEZA is the only mattress on our market where you can choose the mattress core according to your body height. Three variants of different zoning range will guarantee you body support exactly in the places where it is most needed.

detail of ALTEZA TALALAY  
mattress core

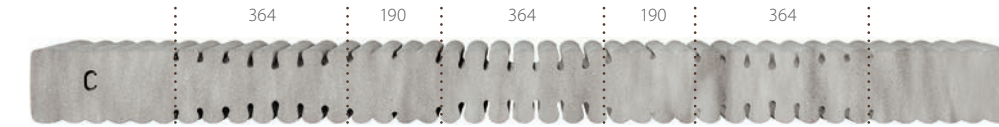

detail of ALTEZA TALALAY  
mattress cover

Cutting the core profile "A" for a figure height of 160 to 170 cm.

Cutting of the core profile "B" for a height of 171 to 185 cm.

Core cutting profile "C" for height over 185 cm. Can only be ordered for mattresses with a minimum length of 210 cm.

## A. ALTEZA TALALAY MATTRESS COVER

This cover stands out for its elegance, softness and is very pleasant to the touch. Natural silk fiber contains protein substances similar to human skin, and therefore has a beneficial effect on it. In addition, the fiber resists microorganisms and does not cause any allergic reactions. Natural silk is supplemented with natural bamboo fiber with antibacterial effects.

## B. HOLLOW-FILL SHAPED FIBER

The hollow fiber is treated with silicone, which gives it exceptional fluffiness and durability. Extra weight fiber weight of 300 grams per m<sup>2</sup> thus enhances the overall comfort of the mattress.

## C. NON-WOVEN TEXTILES

The highly elastic fabric, which co-creates the elasticity of the entire cover, is essential for maximum use of the shape properties of the mattress core. At the same time, the fabric protects the core of the mattress against dirt.

# ALTEZA TALALAY

## FEATURES OF THE ALTEZA TALALAY MATTRESS

The ALTEZA TALALAY mattress was created with the aim of ensuring the correct zoning of the core in proportion to the individual height of the user. Thanks to three versions of zoning, the mattress provides ideal support for the body in the anatomically correct position. For this reason, the height of the user must be taken into account when choosing a mattress. We offer three versions: A, B and C, while the "C" profile version can only be ordered for mattresses with a minimum length of 210 cm.

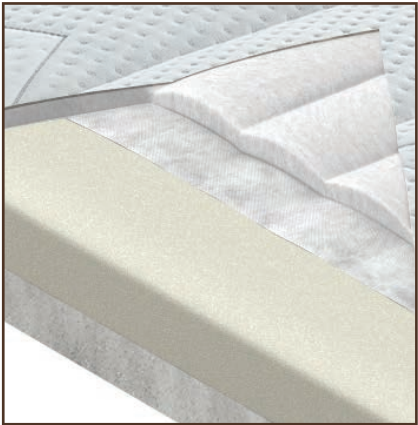

In addition to the basic material in the core, which is certified NANOSILVER cold foam, the mattress is supplemented on the surface of one side with another exceptional material, TALALAY LATEX – the only latex with an open cell structure. TALALAY LATEX is point-adaptable and long-term elastic. Its elasticity, which wins you over today, will remain unchanged even after many years of use. Another foam used on a natural basis is the exceptional BIOGREEN, in which its basic production component is replaced by natural castor oil. It ensures a gradual transition from soft, elastic and dot-copy latex to a stronger core, necessary for ideal spine support during sleep.

ALTEZA TALALAY mattress is produced in two versions of stiffness H2 and H3. At the same time, the core of the mattress has two surface hardness, while the latex side appears softer.

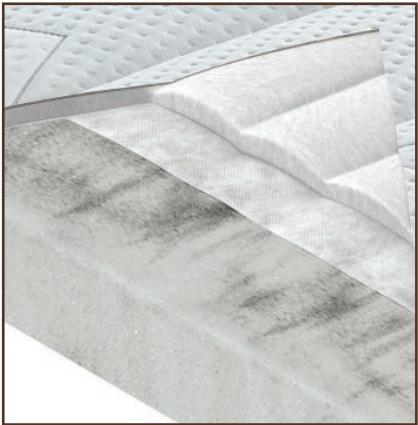

MATTRESS TOPPERS

COMFORT TOPPERS THAT ELIMINATE  
CRITICAL BED PRESSURES ON CONTACT  
SURFACES OF THE BODY

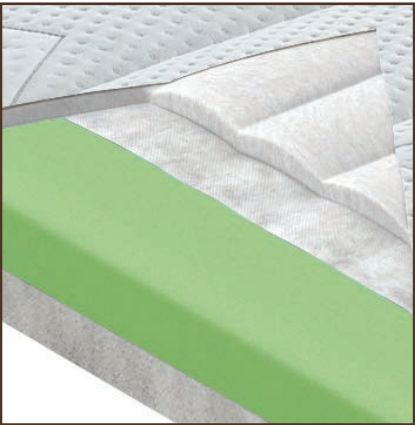

TOPPER VISCO

TOPPER VISCO – MINDFOAM® memory foam adapts perfectly to the curves of the human body. The topper is extremely comfortable and, thanks to the properties of the viscoelastic foam, also feels warm. TOPPER VISCO is especially suitable for people who prefer the feeling of a “warmed” bed.

TOPPER FIRM

TOPPER FIRM – TALALAY LATEX® foam feels stiffer, but at the same time extremely elastic and well adaptable. This topper is created for people who prefer to sleep on a harder base.

TOPPER SOFT

TOPPER SOFT – is extremely flexible and airy at the same time. The top layer of exclusive GREENGEL foam ensures maximum comfort and airiness. The bottom layer of NANOSILVER® foam provides the required support for the spine. This model meets all the requirements for an ideal mattress topper.

MATTRESS TOPPERS

Toppers fundamentally adjust the stiffness of the continental beds, and thus the resulting feeling of comfort during sleep. A suitably chosen topper should be pleasant soft, with the ability to adapt to the shape human figure. Comfort topper eliminates critical the pressure of the bed on the contact surfaces of the body, which reduces muscle tension. This, in turn, will positively affect the quality of sleep, which is deeper and more peaceful. FERRETI offers three types of mattress toppers.

FERRETTI quality guarantee

# ANATOMICAL PILLOWS

PILLOWS PROVIDING PERFECT SUPPORT AND RELAXATION FOR YOUR NECK AND SHOULDER MUSCLES

## PICARDI

IDEAL HEAD SUPPORT AND THE CERVICAL SPINE

The shaped PICARDI anatomical pillow was developed with regard to human anatomical dispositions. The high-quality memory foam forming the core of the pillow, in combination with the precisely shaped core, will guarantee the perfect position of the cervical spine and at the same time allow an even distribution of the weight of the head. The PICARDI anatomical pillow provides a unique feeling of softness with minimal back pressure. It is recommended above all for those who suffer from back or cervical spine pain. The anatomical PICARDI pillow is ideal for sleeping on your side.

Dimensions of the pillow: 60x43x10 – 11 cm  
Guarantee: 3 years

## LIMOUSIN

IDEAL HEAD SUPPORT AND THE CERVICAL SPINE

Let your cervical spine be pampered with an anatomical pillow of traditional LIMOUSIN shape. The high-quality memory foam forming the core of the pillow will allow the weight of your head to be evenly distributed and guarantee the optimal position of your cervical spine. The LIMOUSIN anatomical pillow will give you an incredible feeling of softness with minimal back pressure. It is suitable for those who suffer from back or neck pain. The LIMOUSIN anatomical pillow is intended for sleeping on the side and on the back.

Dimensions of the pillow: 72x43x12 cm  
Guarantee: 3 years

# QUILT AND PILLOW

BLANKET AND PILLOW FOR OPTIMAL TEMPERATURE REGULATION

The down quilt and pillow from the FERRETI collection, thanks to the unique properties of the down, create ideal conditions for sleep. The down maintains an optimal temperature, breathes perfectly and at the same time provides natural regulation heat and humidity during sleep.

The area of the quilt is divided into equally sized chambers, between which the fluff cannot move. Due to the uniform distribution of the filling over the entire surface and in each part (at the edges or in the middle), the quilt has the same warmth. The filling made of pure down without feather content (ROYAL quilt) gives the quilt "lightness" while maintaining high warmth. Another of the Ferreti quilts is the EXCLUSIVE quilt, which, in addition to down,

also contains feathers in an amount of up to 10%.

The pillow consists of three chambers. The two outer chambers are filled with pure down to create an initial impression of softness. The inner chamber is filled with down with an admixture of feathers in a volume of up to 15 %, which ensures proper head support during sleep. The highest quality of the products is also confirmed by the awarded international certificates

NOMITE and DAUNASAN..

## TABURET A BENCH

PRACTICAL STOOL WITH STORAGE SPACE AND A BENCH

For all FERRETI beds, we offer a design-identical and at the same time very practical stool with storage space. By purchasing a stool, you will not only get extra storage space and a comfortable place to sit while changing, but you will also enhance the overall impression of your bedroom interior. In addition, you can have the lid of the stool in the same design as the head of the bed, while the stool is upholstered in the same upholstery fabric as the bed itself.

The offer also includes a BENCH, which has no storage space, but will serve well for sitting while getting dressed.

STOOL with storage space (LxWxH): 40/160/180/200x40x55 cm.
