

FERRETI

SLEEPING SOLUTION

FERRETI

THE FERRETI BRAND WAS DEVELOPED THROUGH A CAREFUL, LONG-TERM PROCESS BASED ON MANY YEARS OF KNOWLEDGE AND EXPERIENCE IN THE FIELD OF HUMAN SLEEP.

Philosophy

THE PHILOSOPHY OF FERRETI IS TO PROVIDE PEOPLE WITH HIGH-QUALITY SLEEP.

During sleep, vital regenerative processes take place in the body, directly affecting the immune system, health and, ultimately, quality of life. Sleep has a positive effect on our mental balance and well-being, stimulates vital energy and enhances vitality. Quality sleep is therefore one of the essential conditions for living a fulfilling life.

The FERRETI brand is the embodiment of a desire for perfection. Our aim is to create comprehensive sleep systems. We focus on each component of the bed individually, with the ultimate goal of transforming sleep into an "experience".

At FERRETI, we bring together design, high-quality materials and advanced construction solutions in perfect symbiosis. These are the three key pillars on which we strive to build first-class products.

At FERRETI, we create technically advanced and progressive systems that provide ideal solutions for your sleep. Every effort is devoted to carefully balanced sleep systems consisting of luxury beds, mattresses and mattress toppers. Anatomical pillows complete the range.

We do not overlook any product that directly influences the quality of sleep. The range features premium materials that help make your sleep restorative, relaxing and harmonious. The effectiveness of these materials is further enhanced by the precise construction of each product. This is why every product performs its function perfectly within the comprehensive sleep system and can be further customised according to the individual needs of the user.

The above-mentioned qualities are the result of continuous development and innovation.

Allow FERRETI to become part of your life through deep, high-quality sleep.

Presentation of FERRETI

At FERRETI, we draw on 30 years of experience in manufacturing products designed to support healthy sleep. Our first products were mattresses. However, the FERRETI vision has always been to provide a comprehensive solution for high-quality sleep, which is why our range has gradually expanded to include luxury beds, anatomical pillows and other accessories.

Quality is one of the fundamental pillars of FERRETI. For this reason, we use only first-class materials from leading European suppliers in our manufacturing process. Our team of experienced specialists carefully selects only the very best for FERRETI. The textile materials used meet the requirements of OEKO-TEX® STANDARD 100 certification to the extent declared by their suppliers. Technology is an essential prerequisite for quality, which is why our machinery comes from leading manufacturers in Germany and Italy. Our production process is managed according to a certified quality management system in compliance with the ISO 9001 standard.

At FERRETI, a team of development specialists works in cooperation with leading manufacturers worldwide to create comprehensive solutions for healthy sleep. Their goal is to apply the latest research findings to our final products. Through continuous innovation, we constantly improve the quality, functionality and practical benefits of our products. In this way, we fulfil the FERRETI philosophy – to provide people with high-quality sleep.

FERRETI
SLEEPING SOLUTION

MATTRESS TOPPER

The mattress topper is the top layer of the continental bed system and the part that comes into direct contact with the body. It determines the overall sleeping comfort and allows the user to choose the desired feel according to their individual preferences.

MATTRESS

The mattress plays an essential role in the continental bed system. It follows the contours of the body, stabilises the spine in the correct anatomical position and significantly determines the overall hardness of the bed.

BOXSPRING

The boxspring is a key component of the continental bed system. It provides an airy, resilient base suitable for all types of mattresses. The boxspring is unique in its ability to provide precise, point-by-point body support.

CONTINENTAL BED – A UNIQUE SYSTEM FOR HIGH-QUALITY SLEEP

The FERRETI range of continental beds is the embodiment of our vision of perfect sleeping comfort. The concept of sleeping on a continental bed is recognised worldwide as the gold standard for high-quality sleep.

Today, it is one of the most sophisticated sleep systems, consisting of three components: a flexible boxspring, a mattress and a mattress topper. Each component performs its specific function, while working together as a complete system to ensure optimal sleeping conditions.

The construction of a continental bed creates a unique double-suspension effect, providing the required orthopedic support for the spine while creating an unparalleled feeling of comfort.

WITH FERRETI, DISCOVER A NEW DIMENSION OF SLEEP.

Beds

LUXURY FERRETI BEDS – THE KEY TO LIVING LIFE TO THE FULLEST.

Only a person full of energy and vitality can truly enjoy the unique moments of everyday life. They can take pleasure in their work, pursue their passions and, at the same time, enjoy precious moments spent with family and friends.

All of this requires plenty of energy – energy that we use up during the day and need to restore during the night.

FERRETI is about energy. FERRETI is about sleep.
FERRETI is about deep sleep.

It is not simply sleep, but only the deepest stages of sleep that allow our bodies to truly rest. This is when our mental and physical strength is restored. Only during the deepest sleep does the body regenerate, repair itself and replenish its depleted energy reserves.

Deep sleep is also the time when our mind and subconscious can rest. This is when we let go of stress, forget our worries and leave our problems behind. Our mind becomes clear and regains its inner peace and mental balance.

Only after a night of truly restorative, deep sleep do we wake up completely refreshed and ready to make the most of another day. We are filled with energy and ready to conquer the world. Suddenly, nothing seems impossible...

Discover your energy, rediscover your vitality, live life to the fullest – discover FERRETI.

ITALIAN DESIGN

The latest addition to the MATERASSO Slovakia, s. r. o. portfolio is the ITALIAN DESIGN with MATERASSO collection. This collection features a range of upholstered beds characterised by simplicity, lightness and understated elegance.

The beds from the ITALIAN DESIGN with MATERASSO collection have a clean, balanced and harmonious appearance. Their unique elegance is achieved through a combination of carefully selected upholstery materials in natural colours, refined craftsmanship and meticulous attention to detail. It is precisely this attention to detail that forms the defining element of the distinctive design of the MODENA and CREMONA beds.

The beds from the ITALIAN DESIGN with MATERASSO collection are ideal for interiors where functionality and practicality blend naturally with a connection to nature. Their simplicity and clean lines stand out beautifully in modern spaces that emphasise minimalism and natural materials.

Sleep systems

THE HEADBOARD DESIGN YOU CHOOSE CAN BE COMBINED, ACCORDING TO YOUR REQUIREMENTS, WITH ANY SLEEP SYSTEM FROM OUR RANGE.

BECOME THE CO-CREATOR OF YOUR OWN BED.

To fulfil your vision of the perfect bed and meet your functional requirements, any headboard from the FERRETI collection can be combined with one of the sleep systems listed below.

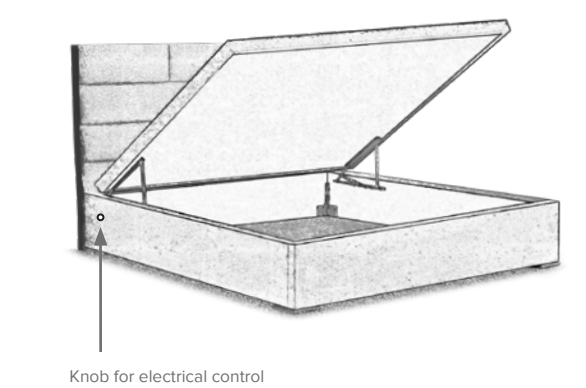

To ensure your complete satisfaction, we also offer a wide selection of upholstery materials in a diverse range of colours, patterns and weaves.

The final look of your bed can be enhanced by choosing the right legs – considering their shape, material and finish.

Every stage of the production process throughout the FERRETI collection is focused on creating products of the highest quality. That is why we place emphasis not only on the uniqueness and functionality of our constructions, but also on the perfect design and craftsmanship of the wooden structures, the careful selection of high-quality materials and precise upholstery workmanship.

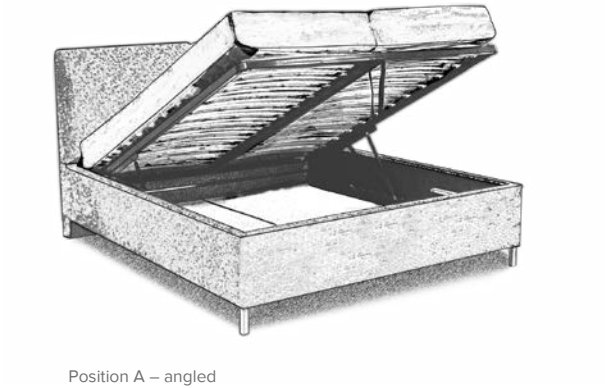

UP Maxi Elektro Lift

Boxspring with a storage compartment operated by an electric lifting system. This type of sleep system offers several advantages. It is space-efficient, as the bed occupies the same amount of floor space as the sleeping area. At the same time, the bed provides a large, undivided storage compartment. The greatest benefit is the integrated ELECTRIC LIFT system, which allows the UP storage compartment to be opened effortlessly using a remote control and electric motor, even when fitted with high-quality mattresses with greater height and weight.

Design bed metal lift UP

When accessing the storage compartment (UP), the slatted base can be set to position A (angled) and then moved from position A to position B (horizontal). A designer bed with one of the most accessible storage compartments (UP), providing easy access across the entire surface. The storage compartment also features a mechanism that allows the slatted base to be lifted into a horizontal position, making it easy to change bed linen or the mattress cover after washing, as well as to ventilate the storage compartment. This lifting mechanism also allows a single large mattress to be used across

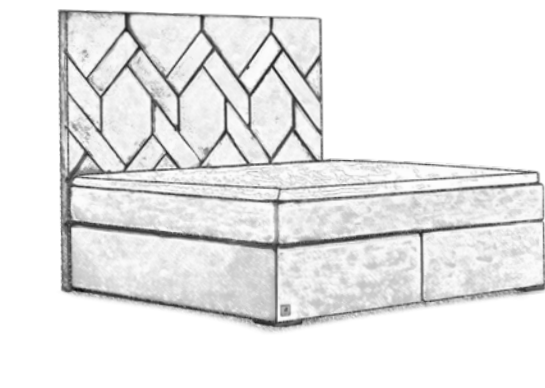

the entire bed without restricting access to the storage compartment (UP). When the slatted base is lifted into the position for changing bed linen or the mattress cover after washing, the storage area directly beneath the headboard remains easily accessible – an area that is completely inaccessible with similar lifting mechanisms operated from the foot of the bed. Another advantage is the possibility of ventilating the underside of the mattress during the day by lifting the slatted base into a horizontal position. This helps prevent insufficient ventilation of the mattress when it is used on a bed with a storage compartment (UP).

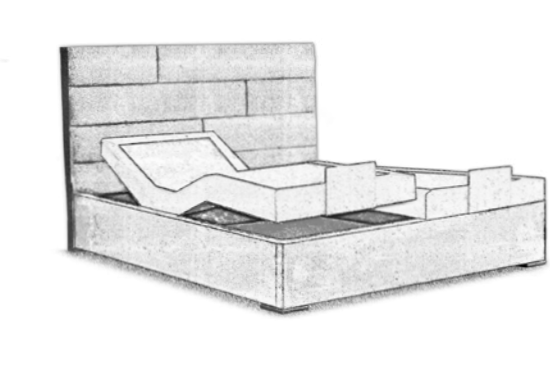

Boxspring low/high

A boxspring featuring a system of individually responsive pocket springs. It provides a stable, breathable and resilient base that helps absorb critical pressure points, thereby extending the lifespan of mattresses and mattress toppers.

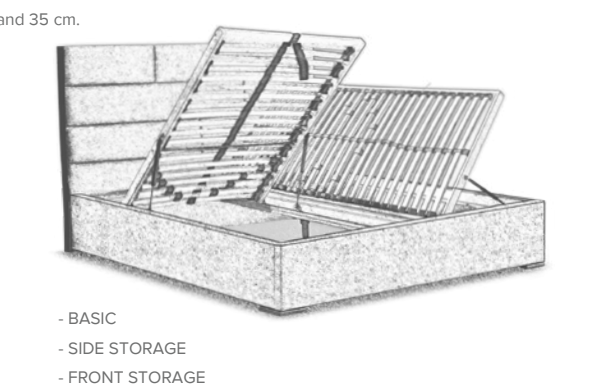

Boxspring mobil

The core of the adjustable section of the boxspring is made up of pocket springs, providing a level of comfort that is difficult to achieve with other constructions. Combined with a carefully selected mattress, the electrically adjustable core creates a bed that meets the expectations of even the most demanding customers.

Design bed

The storage compartments (UP) are available with slatted bases that lift from the foot end (NV) or from the side (BV). When choosing the type of lifting mechanism, the available space around the bed should be taken into consideration – in particular, which side will provide more convenient access to the storage compartment (UP). In the version without a storage compartment (UP), in addition to all standard slatted bases from our range, special electrically adjustable slatted bases can also be used. They provide absolute comfort not only during sleep, but also during moments of relaxation, for example while reading. The side panel heights are available in 25 cm, 30 cm and 35 cm.

DAMIANI SWISS

ALPINE LUXURY

DAMIANI SWISS is a luxurious bedroom set comprising a bed, bedside tables and a bench, combining precise Swiss design, timeless elegance and exceptional comfort. The centrepiece of the bed is its square-panelled headboard with integrated LED lighting, spotlights, control panels, a USB port and an electrical socket for maximum convenience. The visually light yet exceptionally stable frame, featuring precise upholstery craftsmanship and softly rounded corners, enhances its sophisticated appearance. The bed offers a choice of different slatted bases, mattresses and upholstery fabrics, allowing it to be perfectly tailored to individual requirements. DAMIANI SWISS brings together design, craftsmanship and ultimate comfort in perfect harmony – for sleep that restores both body and mind.

THE CHARM OF PLAYFUL DELICACY

The BELLA bed is distinctly feminine, elegant, delicate and playful at the same time. Its defining feature is the generously proportioned headboard, richly decorated with individually upholstered buttons and finished on both sides with gently rounded edges. The striking three-dimensional effect of the headboard is created through the symmetrical tufting of a large number of buttons. The foundation of its exceptional design lies in the high quality of the materials used and their impeccable craftsmanship.

THE TIMELESS BEAUTY OF A DIAMOND

The king of gemstones – the DIAMOND – became the main inspiration behind the design of the FELICITY bed's headboard, a symbol that reminds us of the precious and important moments in our lives. Just as the beauty of a diamond is enhanced through precise cutting, the beauty of the FELICITY bed is created through masterful, highly skilled upholstery craftsmanship. Behind the clean geometric design of the headboard lie hours of meticulous work by the finest upholstery specialists. Like a diamond, the FELICITY bed is beautiful, elegant and stylish, bringing a lasting touch of luxury to both classic and modern interiors.

THE SAFETY OF A CHILD’S BED

The MIA children’s bed is an ideal choice for parents looking for a high-quality and stylish bed for their child. Its distinctive design feature is the gently curved ends of the headboard panels. These elements give the bed a unique appearance while also helping to ensure the child’s safety. The MIA bed is designed to minimise the risk of injury while providing children with a comfortable and safe sleeping environment. All materials used are of the highest quality, making the bed not only safe, but also strong and stable. Thanks to all its features and qualities, the MIA children’s bed is an excellent investment in the future of both the child and the whole family.

Design

The high standard of craftsmanship applies not only to the construction, but also to the aesthetic aspect. Perfect design is reflected in every detail – from the surface stitching to the internal structure of the mattress core.

Material

For your maximum comfort, only the highest-quality materials have been used. Thanks to their exceptional antibacterial properties, they also provide protection while you rest.

Construction

Timeless construction systems have been developed specifically for your undisturbed sleep. Throughout the night, your body receives the support it needs.

Mattresses

FERRETI STRIVES FOR PERFECTION,
WHICH MEANS STRIVING TO BE EVEN BETTER
THAN THE VERY BEST.

It ventures into places where no one has gone before.
This desire for perfection drives FERRETI to continuously
push beyond the boundaries of conventional thinking
about sleep.

With every new solution, FERRETI raises the standards
of technology and product design. Thanks to this constant
pursuit, ordinary sleep becomes an experience.

PRIVÉ COLLECTION

The PRIVÉ Collection represents the pinnacle of the FERRETI range. It was created for customers seeking exceptional comfort, premium natural materials and precise craftsmanship. Every detail is designed with an emphasis on quality, elegance and a unique sleep experience. The PRIVÉ Collection is available exclusively through carefully selected partners. We believe that true luxury should be experienced in person – through touch, comfort and the precise craftsmanship of every detail.

Visit one of our partner showrooms and discover
the exceptional world of the PRIVÉ Collection.

DIAMOND COLLECTION

DIAMOND is a collection of premium mattresses designed to achieve the perfect balance of comfort, point elasticity and natural body support. Thanks to precisely developed core profiling and high-quality foams, the mattresses respond sensitively to every movement, distribute pressure evenly and create a harmonious environment for high-quality sleep.

Each model in the collection offers a unique approach to comfort, yet all are united by an emphasis on natural spinal support and an exceptional feeling of comfort.

ROYAL COLLECTION

The ROYAL Collection represents our most luxurious mattresses, carefully crafted from first-class materials with exceptional attention to detail and quality. They are designed to meet the most demanding sleep requirements and provide a feeling of complete comfort and relaxation. They offer a high degree of flexibility in choosing the final Hardness, allowing you to create the perfect level of comfort according to your individual preferences. Our collection includes the KING and QUEEN mattresses, as well as the TOPPER ROYAL mattress topper.

Treat yourself to the very best with the ROYAL Collection by FERRETI and discover a world of endless luxury and comfort while you sleep.

DIAMOND STRETCH MATTRESS COVER – COLLAGEN

Collagen is a biocompatible structural protein that is ideal for supporting the regeneration of skin and tissues. The collagen fibres in the COLLAGEN cover are specially treated for use in textile materials and contribute to a soft and comfortable surface.

If you want to experience restorative sleep, try a mattress cover containing collagen. The fabric has a high weight and is exceptionally soft to the touch, ensuring long-lasting durability and a high level of comfort. The soft surface provides a pleasant feeling when in contact with the skin and emphasises the premium character of the mattress.

DIAMOND STRETCH

STRETCH & ADAPT

Active regeneration and natural stretching.
DIAMOND STRETCH represents a premium solution for an active lifestyle without limitations.

FEATURES OF THE DIAMOND STRETCH MATTRESS

The unique profiling of NIGHTFLY foam supports gentle and natural stretching of the spine, helps relieve pressure between the vertebrae and contributes to reducing accumulated tension in the back muscles.

Combined with the NANOSILVER core, the mattress provides firm, stable support while intelligently adapting to the individual needs of the body. The result is a harmonious balance between flexibility, support and overall sleeping comfort.

The mattress cover is enhanced with practical handles that make handling the mattress easier.

SLEEPING SOLUTION

Neroli

ROYAL TOPPER COVER

The premium cover, enriched with natural silk and bamboo fibres, combines a soft feel with elegant design. The result is a comfortable surface that enhances everyday relaxation and emphasises the overall sense of luxury.

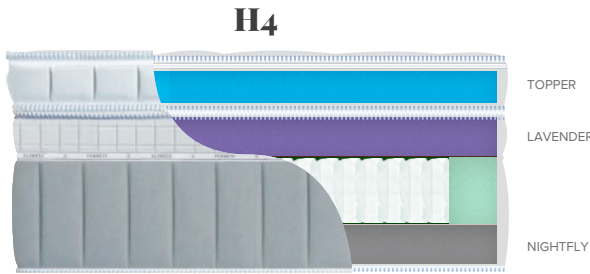

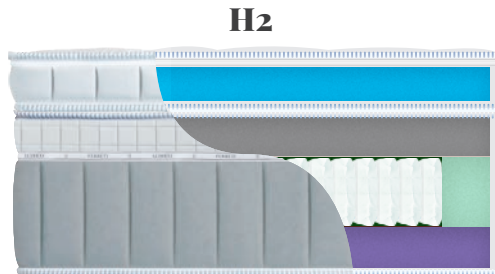

FEATURES OF THE ROYAL TOPPER

NEROLI foam is enriched with essential oil extracted from bitter orange blossoms, one of the most precious natural aromatic oils. In aromatherapy, neroli is traditionally associated with feelings of relaxation, harmony and calm. Combined with high-quality HR foam, it creates a comfortable topper with a soft, pleasant surface, designed as the ideal complement to mattresses from the ROYAL COLLECTION. It provides exceptional comfort while lying down and completes the unique feeling of luxurious relaxation.

TOPPER ROYAL

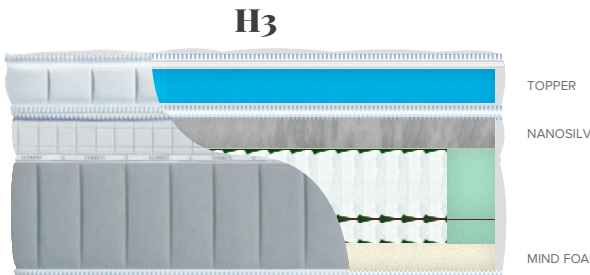

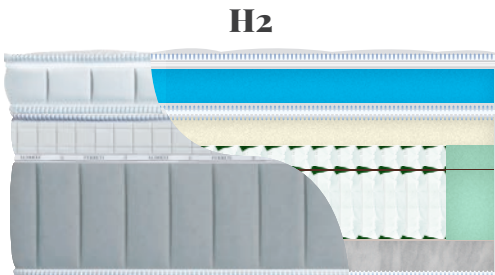

COMFORT TAILORED TO YOUR PREFERENCES.

The topper is designed as the ideal complement to mattresses from the ROYAL COLLECTION, creating a perfectly coordinated sleep system. It enhances comfort, gently follows the contours of the body, and helps distribute pressure evenly, contributing to muscle relaxation and more restful sleep.

QUEEN

Combined with the reversible core of the QUEEN mattress, it allows you to adjust the final hardness according to your preferences. On the NIGHTFLY foam side, it creates a more comfortable feel with H2 hardness; when turned to the LAVENDER foam side, it provides firmer support with H4 hardness.

KING

When combined with the KING mattress core, it also expands the possibilities for individually adjusting your comfort. The Mind Foam® side provides a more comfortable feel with H2 hardness, while turning it to the NANOSILVER foam side creates H3 hardness.

COLLAGEN GLAMOUR MATTRESS COVER

The cover is made from high-quality fibres and enriched with collagen and selenium. Collagen is a natural component of the skin and is associated with its firmness and elasticity, while selenium is known for its antioxidant properties. The soft surface provides a pleasant feeling when in contact with the skin and emphasises the premium character of the mattress.

HOLLOW-FILL FILLING AND COMFORT FOAM

The cover is quilted with a layer of comfort foam and soft HOLLOW-FILL fibre, providing volume, softness and pleasant comfort while lying down. The high-weight filling further contributes to the luxurious feeling of relaxation.

BOTTOM FABRIC

The highly elastic bottom fabric supports the flexibility of the cover while protecting the mattress core from everyday soiling.

COLLAGEN GLAMOUR

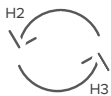

LUXURY THAT AWAKENS YOUR BEAUTY.

COLLAGEN GLAMOUR is a perfectly balanced premium mattress. It combines the finest qualities of modern COLLAGEN, LAVENDER and MINDFOAM foams. It provides exceptional point elasticity and excellent pressure relief. Its innovative layer configuration further enhances its unique properties.

Lavender

evoMind
Maximum Comfort

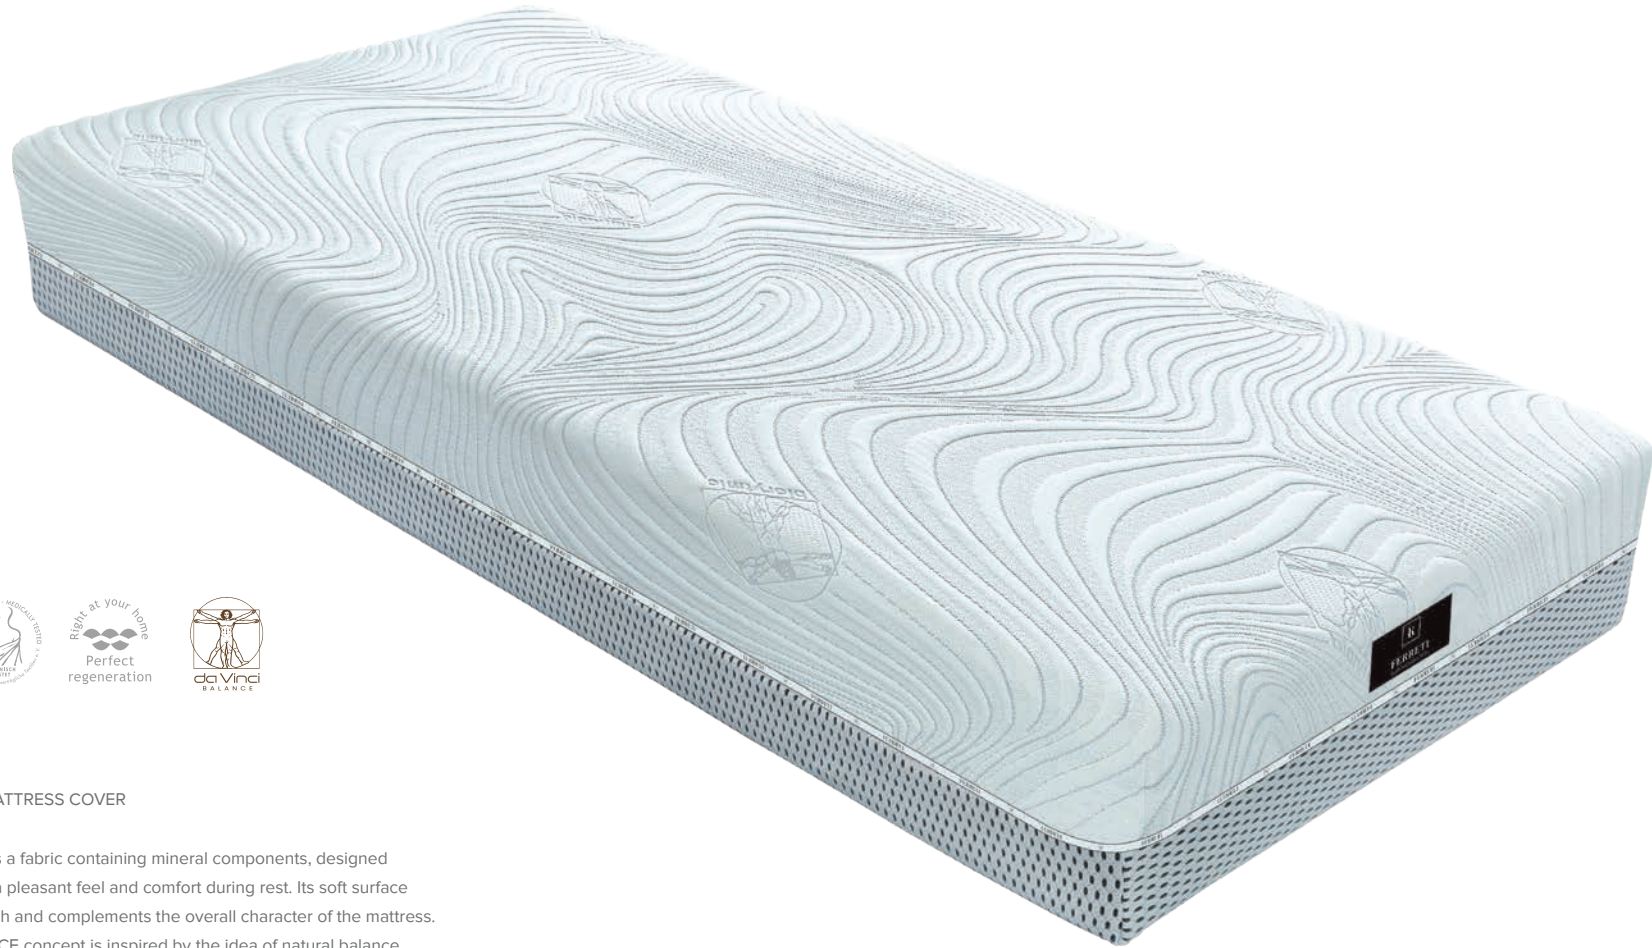

FEATURES OF THE COLLAGEN GLAMOUR MATTRESS

COLLAGEN GLAMOUR is a perfectly balanced premium mattress that combines the benefits of modern COLLAGEN, LAVENDER and MINDFOAM foams. It provides exceptional point elasticity, effective pressure relief and a high level of comfort throughout the night. The innovative layer configuration ensures an immediate response to body movement – the elastic COLLAGEN foam provides resilient support from the very first moment, while the thermoelastic foam gradually adapts to the body's temperature and contours. The result is a dynamic mattress that quickly responds to changes in sleeping position while providing stable support and pleasant comfort throughout the night.

COLLAGEN GLAMOUR MATTRESS CORE COMPOSITION

1. Elastic COLLAGEN foam
2. Thermoelastic MINDFOAM
3. LAVENDER foam with a contour-cutting system
4. Elastic COLLAGEN foam

ELEANOR HYBRID MATTRESS COVER

DA VINCI BALANCE is a fabric containing mineral components, designed with an emphasis on a pleasant feel and comfort during rest. Its soft surface is pleasant to the touch and complements the overall character of the mattress. The DA VINCI BALANCE concept is inspired by the idea of natural balance and harmony. Combined with the thoughtfully designed mattress construction, it creates a comfortable environment for everyday rest and moments of relaxation.

A pleasant touch, comfort and balance for your rest.

ELEANOR HYBRID

A HYBRID MATTRESS
WITH INDIVIDUAL COMFORT OPTIONS

The exceptional point elasticity of MIND FOAM® memory foam, combined with pocket springs and cold foam, creates a harmonious balance of comfort, resilient support and natural body contouring. ELEANOR HYBRID is also available as a partner mattress, with each half featuring a core with a different Hardness level according to individual preferences. The result is a single mattress offering different levels of comfort on the right and left sides.

ELEANOR HYBRID MEDIUM MATTRESS CORE COMPOSITION

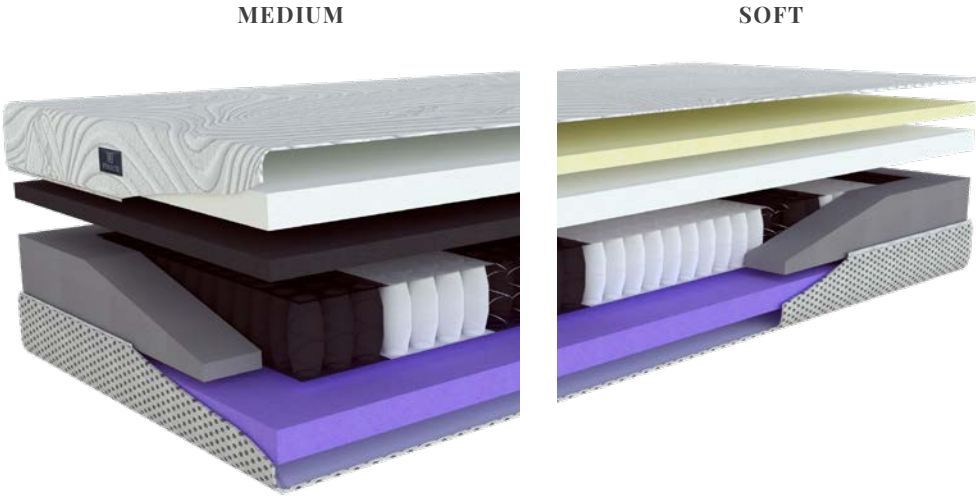

1. MIND FOAM® MEDIUM
2. BLACK DIAMOND foam
3. Multipocket System 1000 springs
4. Reinforced sides – NIGHTFLY foam
5. LAVENDER foam

In the Medium version, one layer of MIND FOAM® is replaced with BLACK DIAMOND foam, giving the mattress a firmer character. The foam is distinguished by its high resilience, stability and long-lasting performance, providing reliable support and comfort throughout the mattress's lifetime.

ELEANOR HYBRID SOFT MATTRESS CORE COMPOSITION

1. MIND FOAM® SOFT
2. MIND FOAM® MEDIUM
3. Multipocket System 1000 springs
4. Reinforced sides – NIGHTFLY foam
5. LAVENDER foam

The Soft version combines two layers of MIND FOAM® memory foam with the Multipocket System 1000 to achieve maximum comfort. Thanks to the high number of individually pocketed springs, the mattress responds sensitively to different body weights and contours, distributes pressure evenly and provides resilient support throughout the night.

RAYON MATTRESS COVER

The VISCOSE fibre used as the basis of the mattress cover is made from cellulose. This gives the fabric excellent moisture absorption, wrinkle resistance, breathability and exceptional flexibility, allowing it to perfectly support the point elasticity of the mattress core.

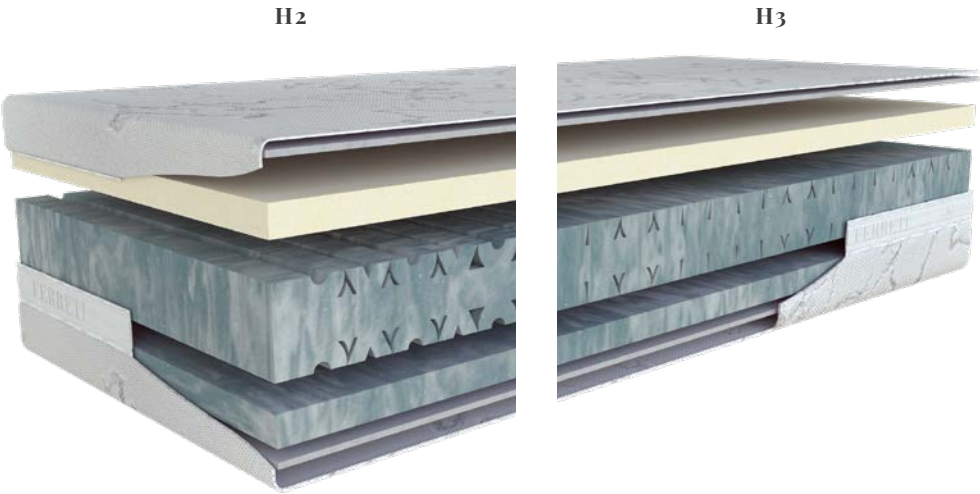

The cover fabric is exceptionally soft and comfortable to the touch. Its uniquely woven pattern gives the mattress an elegant and sophisticated appearance.

RAYON

A MATTRESS WITH MINIMAL COUNTERPRESSURE ON YOUR BODY.

Pamper your body with the RAYON mattress. A thick layer of high-quality memory foam allows your body weight to be distributed evenly across the entire surface of the mattress with minimal counterpressure. This effect is also described as a state of weightlessness.

FEATURES OF THE RAYON MATTRESS CORE

The upper layer of the mattress consists of high-quality MIND FOAM® memory foam, which responds sensitively to body temperature and naturally adapts to the contours of the body. Thanks to its high point elasticity, it helps distribute pressure evenly and provides a pleasant feeling of comfort throughout the night.

MIND FOAM® memory foam was developed with an emphasis on comfort while lying down. Its viscoelastic structure, combined with minimal counterpressure, ensures smooth adaptation to the body's position and supports natural comfort with every change of position.

The lower part of the core consists of branded NANOSILVER foam, which is characterised by exceptional resilience and high point elasticity. Together, these materials create a harmonious combination of soft comfort and stable support.

The RAYON mattress is available in Hardness H2/H3 and in heights of 20 cm and 25 cm, allowing everyone to choose the level of comfort according to their individual preferences.

- HEIGHT: 20, 25 cm
- LOAD CAPACITY: up to 130 / 150 kg
- HARDNESS: H2 / H3
- WARRANTY: 10 years

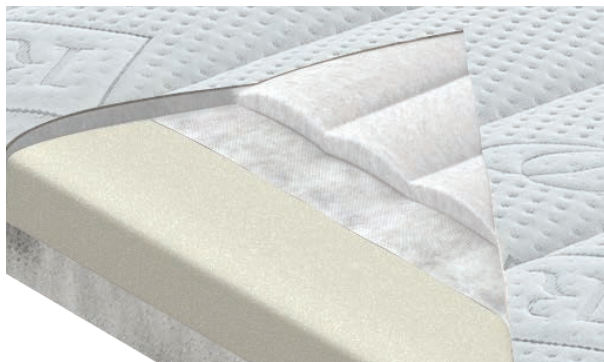

Mattress toppers

COMFORTABLE TOPPERS THAT ELIMINATE CRITICAL PRESSURE FROM THE BED ON THE BODY’S CONTACT AREAS.

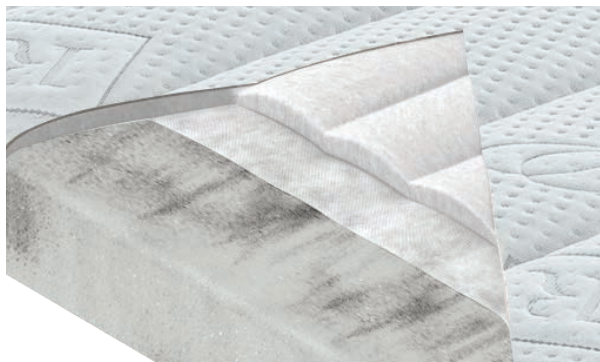

Toppers significantly modify the hardness of a continental bed and therefore also influence the overall feeling of comfort during sleep. A well-chosen topper should be pleasantly soft and able to adapt to the contours of the human body.

A comfortable topper helps eliminate critical pressure from the bed on the body’s contact areas, thereby reducing muscle tension. This can have a positive effect on sleep quality, making sleep deeper and more restful.

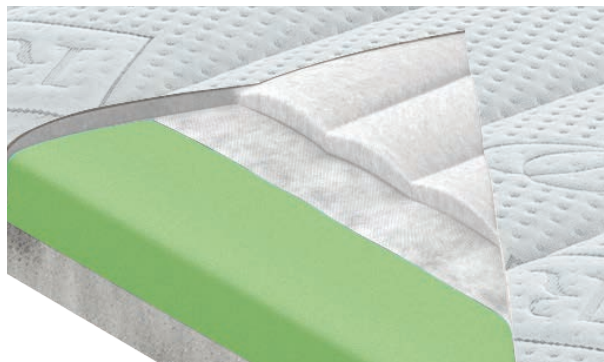

FERRETI offers three types of mattress toppers.

TOPPER VISCO

TOPPER FIRM

TOPPER SOFT

TOPPER VISCO

TOPPER VISCO – MIND FOAM® memory foam perfectly adapts to the contours of the human body. The topper provides exceptional comfort and, thanks to the properties of viscoelastic foam, also creates a pleasantly warm feeling. TOPPER VISCO is particularly suitable for those who prefer the feeling of a “warm” bed.

TOPPER FIRM

TOPPER FIRM – NANOSILVER® foam provides a firmer feel while remaining exceptionally resilient and adaptive. This topper is designed for people who prefer sleeping on a firmer surface.

TOPPER SOFT

TOPPER SOFT – exceptionally resilient and breathable. The top layer of exclusive FRESHGEL foam provides maximum comfort and breathability. The lower layer of NANOSILVER® foam provides the required spinal support. This model meets all the requirements for an ideal mattress topper.

HEIGHT: 10 cm

LOAD CAPACITY: up to 150 kg

WASHING: 60 °C

WARRANTY: 10 years

Anatomical pillows

PILLOWS PROVIDING PERFECT SUPPORT AND RELIEF FOR YOUR NECK AND SHOULDER MUSCLES.

PICARDI

IDEAL FOR SIDE SLEEPING.

The anatomically shaped PICARDI pillow was developed with the natural anatomy of the human body in mind. The high-quality memory foam forming the pillow core, combined with its precisely shaped design, ensures optimal positioning of the cervical spine while allowing the weight of the head to be distributed evenly.

With minimal counterpressure, the PICARDI anatomical pillow provides a unique feeling of softness. It is particularly recommended for people who suffer from back or neck pain.

Pillow dimensions: 60×43×10 – 11 cm
Warranty: 3 years

LIMOUSIN

FOR SIDE AND BACK SLEEPING.

Let the traditional-shaped LIMOUSIN anatomical pillow pamper your cervical spine. The high-quality memory foam forming the pillow core allows the weight of your head to be distributed evenly and ensures optimal positioning of the cervical spine.

The LIMOUSIN anatomical pillow provides an exceptional feeling of softness with minimal counterpressure. It is suitable for people who suffer from back or neck pain.

Pillow dimensions: 72×43×12 cm
Warranty: 3 years

Duvet and pillow

DOWN DUVET AND PILLOW FOR OPTIMAL TEMPERATURE REGULATION.

FERRETI down duvets and pillows create ideal conditions for quality sleep. Down offers excellent breathability and natural temperature and moisture regulation while providing exceptional lightness and warmth. The cassette construction of the duvet ensures an even distribution of the filling and consistent warmth across its entire surface. The ROYAL model is filled with 100 % down, while EXCLUSIVE contains down with up to 10 % feathers. The pillow features a three-chamber construction, combining the softness of the outer down-filled chambers with stable support provided by an inner chamber containing up to 15% feathers. The quality of the products is confirmed by the international NOMITE and DAUNASAN certifications.

Taburet and bench

A PRACTICAL TABURET WITH STORAGE SPACE AND A BENCH.

For all FERRETI beds, we offer a design-coordinated TABURET (OTTOMAN) with practical storage space. It provides comfortable seating for everyday use while elegantly complementing the atmosphere of the bedroom. For perfect harmony, it can be upholstered in the same fabric as the bed, with the lid finished in a design matching the bed's headboard. The range also includes the BENCH, which does not feature storage space but provides convenient seating when getting dressed.

TABURET with storage space (l×w×h): 140/160/180/200×40×55 cm.
BENCH (l×w×h): 140/160/180/200×40×20 cm.
